

Clinical Data Management

Where Deep Expertise Meets High-Volume Capacity

Ephicity delivers efficient clinical data management backed by a team of leading experts and a cost-effective global model. We combine the ability to manage large volumes of data with the knowledge to identify opportunities for greater efficiency and quality. The result is an accelerated path to the next step in your data life cycle.

Flexible Delivery, Adapted to You

FSP

Project-Based

Consulting

We offer a range of delivery models that adapt to your needs. Whether you need FSP engagement that scales up and down rapidly, project-based services with Ephicity oversight, a consultative approach, or a hybrid model, we provide the tailored support you need, when and how you need it.

Our Data Management Services

Solutions across all clinical data operations:

- Clinical data management plan
- Case report form (CRF/eCRF) design
- CRF completion guidelines
- Design and implementation of electronic data capture (EDC) systems
- EDC user training and administration
- Clinical database design, maintenance, and closure
- Data review and quality control
- Data cleaning and extraction (DSMB, DMC, posters, regulatory submissions, etc.)
- Query management and resolution
- External data handling and reconciliation (Corelabs, safety labs, ECG, etc.)
- Medical coding (MedDRA, WHO Drug)
- SAE/UADE reconciliation
- Protocol deviation management
- Database lock and archival
- Fraud protection and auditability

Greater Efficiency & Quality

Our global model maximizes strategic use of resources while giving you access to a team of experts in the United States, Canada, and India. This reduces costs without compromising quality and allows for 24/7 coverage to keep your data moving forward. We supplement human power with strategic use of AI to further accelerate the process.

Ability to Work Within Your Technology Systems

We've worked with a wide range of EDC systems and know how to provide efficient data management with any platform. This means our experts will adapt to the technology you already use, rather than requiring the use of new tools. At the same time, we can recommend data collection best practices and unlock greater efficiencies through consulting early in the process.

Committed to Collaboration

We act as a true extension of your team, whether working with your internal staff or third-party resources. By collaborating with clinical operations from the beginning and adapting to evolving needs, we provide a seamless data management experience from beginning to end.

Experience the Power of Expert Data Management

At Efficacy, we do more than simply manage your data. We collaborate with you to identify opportunities to accelerate your timelines, unlock greater value, and prevent costly delays.
